

“CREATION-EVOLUTION” (Part 2)

Last week we looked at the Creation account from Genesis 1 and saw how God created all living **things according to its kind**. We then looked at Evolution and established its definition, how it originated, and its implications.

We learned that this debate is essentially a **Battle for the Truth**. We learned that the outcomes of these two different worldviews have social and eternal consequences.

Today we will look at a number of problems and inconsistencies with the Theory of Evolution. We will also look at some **specific designs** and see **how orderly** the Created Universe really is.

It is my hope and prayer that this series will bring you into a **closer relationship** with your Creator. It is also my hope that you will **commit your life to Jesus Christ** and settle the issue that life originated by Almighty God and not by chance.

May God Bless you as you **celebrate the life** He has given you. It is a **special Gift!**

Pastor Clay
